Defect Documentation & Bug Reports

This section details the critical flaws, logical errors, and UX inconsistencies identified during the manual audit of the Telemart e-commerce platform.

Bug ID: BUG-001 | Empty Search Input Failure

- **Test ID Source:** TC_02
- **Severity:** Low (Usability/UX)
- **Summary:** The search functionality fails to provide user feedback or validation when an empty search is submitted.
- **Steps to Reproduce:**
    1. Navigate to the Telemart homepage.
    2. Focus on the search bar without entering any characters.
    3. Trigger the search by pressing "Enter" or clicking the search icon.
- **Actual Result:** The application remains static; no error message, tooltip, or visual indicator is provided to the user.
- **Expected Result:** The system should implement front-end validation, displaying a message such as *"Please enter a keyword"* to guide the user.

Bug ID: BUG-002 | Logically Impossible Price Range

- **Test ID Source:** TC_04
- **Severity:** Medium (Functional Logic)
- **Summary:** The price filter allows the execution of searches where the minimum price exceeds the maximum price.
- **Steps to Reproduce:**
    1. Select any product category or perform a generic search.
    2. Input `50,000` into the "Min Price" filter.
    3. Input `10,000` into the "Max Price" filter.
- **Actual Result:** The system processes the impossible query and returns a generic "No Record" result.
- **Expected Result:** The system should include a logic check to prevent the request or display an error message indicating that the minimum price cannot be greater than the maximum.

Bug ID: BUG-003 | Lack of Feedback on Minimum Quantity

- **Test ID Source:** TC_07
- **Severity:** Low (UX Impact)
- **Summary:** The quantity selector in the cart fails to update or notify the user when attempting to decrease quantity below the minimum threshold.

- **Steps to Reproduce:**
    1. Add a product to the cart and proceed to the Cart view.
    2. Interact with the quantity selector to decrease the value from 1 to 0.
- **Actual Result:** The value remains at 1, but no alert or visual feedback is provided, leading to perceived unresponsiveness.
- **Expected Result:** The system should either trigger an item removal confirmation or display a notification stating that the minimum quantity is 1.

Bug ID: BUG-004 | Rating Discrepancy (Data Desync)

- **Test ID Source:** TC_10
- **Severity:** Medium (Data Integrity)
- **Summary:** Product ratings are inconsistent between the Search Results page and the Product Detail Page (PDP).
- **Steps to Reproduce:**
    1. Search for *"Colgate Optic White Extra Power Tooth Paste 75ml"*.
    2. Observe the rating displayed on the search results card.
    3. Click through to the Product Detail Page (PDP).
- **Actual Result:** The search card displays a `0` rating, while the PDP displays a `3` rating.
- **Expected Result:** Data integrity must be maintained across all application layers; ratings should be consistent across all views.
